■ TECHNICAL SKILLS

Languages	JavaScript (ES6+), HTML5, CSS3, C++
Frontend	React.js, Three.js, DOM Manipulation, CSS Animations, Responsive Design
Core Skills	DSA, Problem Solving, Responsive Design
Tools	Git / GitHub, REST APIs, VS Code

■ PROJECTS

Interactive Math Visualizer

Three.js · JavaScript

- Built 3D visual representations of mathematical concepts using Three.js to help beginner-level learners grasp abstract ideas intuitively.
- Designed intuitive UI with interactive controls (zoom, rotate, animate) based on feedback from 5+ test users.
- Iterated on animation-speed controls after discovering they significantly improved learner outcomes.

Real-time Chat Application

Node.js · Express · Socket.io

- Developed a full-stack chat application with real-time messaging; responsive UI engineered to minimise latency perception.
- Incorporated user feedback on message history visibility — added scrollable chat history after testing.
- Key insight: small UX improvements (typing indicators, confirmation states) significantly raised user satisfaction.

■ EDUCATION

B.Tech — Computer Science & Engineering

2023 – 2027

Delhi Technical Campus, IP University

Relevant Coursework: Data Structures, Algorithms, Web Development, UI/UX Fundamentals | Active in campus tech clubs

12th Grade — School of Excellence (2020–2022)

■ INTERESTS & HOBBIES

Gaming & UX Design (analysing game UX patterns) · Fitness · Cricket · Boxing
